
Registration and Supervision

Bachelor Thesis - Registration and Supervision

- The bachelor thesis topics are defined by the relevant modules or departments. The student chooses his / her topic according to his / her focus and interest after consultation with the teachers of their choice.
- The bachelor thesis may be supervised by teacher (even external one) of the relevant module or department, or exceptionally (with the prior approval of the vice-dean for undergraduate studies) another expert who does not teach at FHS CU.
- The bachelor thesis is registered into the SIS by the bachelor thesis supervisor. When registering a thesis, it is necessary to fill in its Czech and English name, the actual language of the thesis, the name of the supervisor and its researcher (ie the student's name).
- If your supervisor is an external teacher without access to the SIS, ask him to send the necessary data to the main coordinator for thesis registration [Ms. Kateřina Jirsová](#) . The topic will then be registered with the help of Secretariat for Bachelor Studies.
- The topic of the thesis needs to be registered into the SIS **at least 180 days** before the planned Thesis Defense.
- You can always check your registration in the SIS under Thesis (Selection of Subject).
